ACCESS TO LEGAL AID FOR VICTIMS – EU PERSPECTIVE

Adoption of the DIRECTIVE 2012/29/EU establishing minimum standards on the rights, support and protection of victims of crime created new challenges in legal aid area. The **Faculty of Law and Administration of the Adam Mickiewicz University (AMU, Poland)** alongside with its partners: Coinfo (Italy); Providus (Latvia), CSD (Bulgaria), including experts from Portugal, Spain and United Kingdom implemented project *“Improving protection of victims’ rights: access to legal aid”* financed by EU.

The purpose was to identify common criteria for the legal aid to be applied in harmonization of EU legislation. Training courses for practitioners (prosecutors, counsels; Police officers, judges) conducted by UN trainers and workshops for NGO’s representatives also took place during the project. We achieved to develop new standards of effective and efficient legal aid for victims. Our research were presented during international conference in Poznań.

Deliverables (general report, practice facilitation handbook, training manuals) and conclusions are

available in publication (P. Wiliński, P. Karlik (eds.), *Improving protection of victims’ rights: access to legal aid*, Poznań 2014) and on the website: www.victimrights.eu.

We encourage every entity interested in Victims’ Rights issues to contact us: wilinski@amu.edu.pl.

The Faculty of Law and Administration AMU is one of the largest and best schools of law in Poland. Currently, it employs in nineteen chairs over a hundred staff members conducting research in different fields of law, administration and economy. The Faculty offers a wide range of practical courses besides the traditional, theoretical subjects. More on:

INNO ROBO PARIS FRANCE

MAY 24-26 2016

Innorobo’s mission is to present the state of the art of world robotics to a diverse range of markets through:

- an **exhibition** illustrating the vast array of robotics technologies,
 - 2 exhibition areas:**
 - A robotics hall to discover the latest innovations in the field
 - A 3D printing hall showing the latest trends in this budding industry
- **conferences** with renowned specialists to stimulate a debate on future technologies and their impacts
 - A day of conference in 3 parts :**
 - An overview of the world robotics market
 - foresight to imagine robotics in the year 2030
 - A technological focus on fundamentals of robotics (IA, Sensors, HRI)
- a **host of workshops** in order to encourage cross-innovation and open up new opportunities for growth and diversification in nearly all sectors.

6 MAJOR ROBOTICS APPLICATIONS IN FOCUS

Innorobo is a human-scale event to stimulate a true dialog on the role of robots in our society and to show the impact of new technologies in our professional and personal lives everyday
